## **Important Information About Your Drug Plan**

This guide lists common brand name and generic prescription drugs that have been reviewed by BlueCross BlueShield of Tennessee. Please refer to this formulary guide for information about the availability of frequently prescribed medications covered by your plan. This guide is not meant to be comprehensive but to provide a list of the most commonly prescribed drugs.

This guide is subject to change. If you are unable to find a particular drug in this guide, it does not necessarily mean that it is not covered. For a more complete listing of drug coverage and costs, you may use our Prescription Drug Search in BlueAccess at bcbst.com. You may also call member service at the number listed on the back your member ID card to confirm a drug's tier status or verify prescription drug benefits.

A formulary is an expanded list of prescription drugs recommended by a health plan. BlueCross' Pharmacy & Therapeutics (P&T) Committee consists of pharmacists and physicians, some of whom are community practitioners. On a quarterly basis, the P&T Committee reviews new drugs for possible placement on the formulary. The committee also routinely reviews all drugs for new safety and efficacy information.

Please refer to your benefit booklet for detailed information regarding your pharmacy benefits, including your tiered benefit structure, out-of-pocket costs and applicable exclusions.

## **Check the Prescription Drug List**

As a first step, check the Prescription Drug List on pages 6-12 to see if it includes drugs you currently take. You'll see generic drugs are on the list, along with many popular brand drugs. If a drug you take is not on this list, talk with your doctor to see if one of the preferred drugs would be just as effective for you.

Working with your doctor and pharmacist, you can use the information in this brochure to make smart choices about the drugs you take and the amount you pay.

Please become familiar with these lists:

- Prescription Drug List (PDL) A convenient list of the preferred and non-preferred brand drugs and generic
  medications that help save you money on your prescription costs. Depending on your drug plan and copay levels,
  your savings could be considerable.
- **Specialty Drug List** These expensive injectable, infusion and oral medications are used to treat serious, chronic conditions such as multiple sclerosis, rheumatoid arthritis, cancer and hemophilia. They often require special handling, education and monitoring during treatment. It's important to know some specialty drugs must be given in a doctor's office (provider-administered), but others can be used at home (self-administered).
- Prior Authorization List (PA) Specific drugs that may need authorization from your benefit plan before they are
  dispensed by your pharmacy.
- **Step Therapy (ST)** Before using a brand-name drug, you may need to first try a similar, alternative medication.
- Quantity Limitations List (QL) In keeping with standard medical practices, certain drugs have limits on the amount that can be purchased at one time.
- **Formulary Exclusions List** Many plans do not reimburse for certain drugs. In some cases, there are alternative products available.

# **Tips on Using Your Prescription Drug Benefits**

It's important to understand how your benefits work and be familiar with the drug choices that are appropriate for you. More information is provided on the BlueCross website at bcbst.com. Simply log into BlueAccess for tips that can help make the most of your prescription drug benefits:

- Talk with your doctor. Doctors are your partners
  in achieving and maintaining your good health, so
  discuss every aspect of the prescribed treatment,
  including the selection of drugs. The more you
  know, the better your choices. Show your doctor
  the Prescription Drug List and discuss the options
  appropriate for you.
- 2. Ask for generic drugs. The U.S. Food and Drug Administration (FDA) requires generic drugs to have the same quality, strength and purity as brand-name drugs. You will pay less for generic drugs almost every time. Under most BlueCross plans, if you request a brand name drug that has a generic equivalent, you will incur a penalty. When a penalty is applied, it will require you to pay the

- Tier 1 copay plus the cost difference between the brand name drug and the generic equivalent. Check your Evidence of Coverage (EOC) to see if this applies to your plan.
- **3. Turn to your pharmacist.** Your pharmacist can answer questions about the drugs you take, help you avoid harmful drug interactions, and help you select appropriate, lower-cost generics and preferred brands whenever available.
- **4. Use a network pharmacy.** Network pharmacies fill your prescriptions and file the claims for you, making the process quicker and easier. Check bcbst.com for a list of network pharmacies.
- 5. Above all, be a smart consumer. The prescription drug industry spends more than \$4 billion on advertising each year to promote its brands. Those costs are passed along to consumers, insurance companies and businesses. So choose a drug based on its effectiveness not its advertising slogan.

## It's Also Important to Remember:

- 1. Some medications are available through
  Preferred Specialty Drug Vendors. (See page 1315 for the list.) You get the highest level of benefits
  when you order specialty drugs through one of the
  preferred specialty drug vendors.
- 2. Some medications require prior authorization or step therapy. (See page 16-17 for the list.)

  Network doctors are usually familiar with these lists and know how to get authorizations. However, you may want to show this list to your doctor especially if you use an out-of-network doctor or a doctor outside Tennessee.
- 3. Some medications have quantity limitations.

  Benefits for most covered prescriptions are provided for up to a month's supply. But some drugs are limited to a specific amount or dose. (See pages 18-19 for the list.)
- **4. Quantities of less than a month's supply.**Coverage for prescription drugs commercially packaged or commonly dispensed in quantities less than a one-month supply will be subject to one copay, as long as the quantity does not exceed the FDA-approved dosage for four calendar weeks.
- **5. You can appeal denials.** If you or your doctor disagree with a denial for a drug that requires prior authorization or has quantity limits, you have the right to appeal the decision. Please read your Evidence of Coverage (EOC) or member handbook for more information.
- 6. Some types of medications are not covered by your plan. (See page 20-21 for exclusions list.)

  Please also review the Limitations and Exclusions section of your EOC or member handbook so you will know what is not covered. An exclusion does not mean you cannot have a particular drug. It simply means that no benefits will be provided, and you will be responsible for the total cost of the drug.
- 7. You can visit our website. With the multi-level approach to prescription copays from BlueCross, you play an important role in managing your benefits costs. Visit our website at bcbst.com for more information about how to get the most out of your drug benefits.

# What You'll Find on Our Website

Your prescription drug benefits from BlueCross include many useful tools to help you get the most from your pharmacy benefits. In addition to the information in this booklet, you can log into BlueAccess at bcbst.com and look under the Manage My Plan tab to find the Pharmacies & Prescriptions link where you can access these easy-to-use tools:

- Online prescription services place mail order refill requests and track prescription orders
- Check drug cost get the estimated cost of your medication and find out about possible generic alternatives, mail order options, and savings opportunities
- Consumer Reports link to Consumer Reports
   Best Buy Drugs<sup>™</sup> that includes cost, effectiveness
   and safety information
- Specialist Pharmacists get an extra level of prescription drug support for members with ongoing conditions that use mail order
- Personal reminders create and schedule refill reminders and order status alerts for mail order prescriptions
- Drug and health information search the formulary to find out the tier status of your drug, check drug interaction and side effects, compare your drug to other drugs in the same therapy class, and get health and wellness information
- **Pharmacy locator** find a participating pharmacy
- Methods of payment pay by credit card, check or money order.

# Over-the-counter medications — Relief you need, when you need it

Did you know some over-the-counter (OTC) medications are exactly the same as some prescription drugs – and usually cost significantly less? Whether you need relief from seasonal allergies, heartburn, certain skin problems or other minor health concerns, you can often get the relief you need, without a prescription from your doctor.

You can learn more about OTC medications and which ones are available at their original prescription-strength without a prescription at bcbst.com.

It's important to know your benefit plan may not

cover prescription drugs that have OTC equivalents. There are more than 100,000 OTC products that contain ingredients previously available by prescription only, so talk with your doctor or pharmacist about which ones might work for you. Most plans do not cover OTC products, but since these usually cost less than prescription drugs, you could end up spending less on the medications you need.

Please check your EOC or member handbook to find out how your plan covers prescription drugs that have equivalents available over the counter.

## **2015 Prescription Drug List**

## **Use Your Prescription Drug List to Save Time and Money**

This guide lists drugs most commonly prescribed for BlueCross members; it is not a complete listing of drugs. It encourages you and your doctor to select drugs recognized as the safest and most effective. Referring to this guide can help you understand how your drug plan works and save money on your prescriptions.

## Generic drugs offer the best value

Prescription drugs can be costly, but many are now available as generics. Generic drugs work the same as brand-name drugs, but cost less. Depending on your drug benefit, using generic drugs may lower your cost share. **Generic Equivalents** are made with the same active ingredients in the same dosage form as a brand-name product, and provides the same therapeutic effects as the brand-name drug. Not all brand-name drugs have generic equivalents, but many do. **Generic Alternatives** may be used to treat the same condition as a brand-name drug. However, it may have a different chemical formula and ingredients. Talk to your doctor or pharmacist if you have questions about generic alternatives.

## What's a Drug Tier?

The drug list includes three tiers of medications: generic, preferred brand-name drugs and non-preferred brand-name drugs. Your copay or coinsurance for your prescription is based on which tier your drug falls into.

Some plans only have two tiers. In this case, this type of plan covers one tier at the lower cost and the second tier at a higher cost. For more details, refer to your EOC or plan documents, or log into BlueAccess at bcbst.com.

## Tier 1 — Generic

Tier 1 drugs are typically the most affordable and offer you the lowest available copayment or coinsurance. The active ingredient in a generic drug is chemically identical to the active ingredient of the corresponding brandname drug. To help lower your out-of-pocket costs, we encourage you to choose a generic medication whenever possible. Look for these drugs under "Tier 1" in this guide.

## Tier 2 —Preferred brand

Tier 2 drugs are usually available at a slightly higher copay or coinsurance than generic drugs. These drugs are designated preferred brand because they have been proven to be safe, effective, and favorably priced compared to other brand drugs that treat the same condition. Look for these drugs under "Tier 2" in this guide.

## Tier 3 — Non-preferred brand

Tier 3 drugs usually have the highest copay or coinsurance. These drugs are listed as non-preferred because they have not been found to be any more cost effective than available generics, preferred brands, or over-the-counter drugs. Look for these drugs under "Tier 3" in this guide.

#### **Drug Benefit Appeals**

Remember: You or your physician may appeal the denial of a drug benefit or a drug quantity limit by faxing supportive documents and information to 1-888-343-4232. Please refer to your EOC or member handbook for more information on your grievance rights.

## **Specialty Pharmacy Network**

Specialty drugs are expensive injectable, infusion and oral medications used to treat serious, chronic conditions such as multiple sclerosis, rheumatoid arthritis, cancer and hemophilia. And they often require special handling, education and monitoring during treatment. It's important to know some specialty drugs must be given in a doctor's office (provider-administered), but others can be used at home (self-administered).

The Specialty Pharmacy Network includes experts in these high-cost, biologic drugs and to offer these medications at special rates. When your doctor writes your prescription and faxes it to the specialty pharmacy your medicine will be sent to your home or other designated location. Plus, pharmacists and nurse specialists are available to answer any questions or concerns about your medication.

Depending on your specific plan, your copay may be higher or the medication may not be covered if you purchase self-administered specialty drugs from another pharmacy instead of a pharmacy in the BlueCross BlueShield of Tennessee Specialty Pharmacy Network. Please check your EOC or member handbook for details about your specific benefits.

The physician may obtain approval and order Specialty Pharmacy Products by calling one of these Specialty Pharmacies. You may also order self-administered drugs from one of these Specialty Pharmacies:

<sup>\*</sup>Requests for participation in the BlueCross BlueShield of Tennessee Specialty Pharmacy Network are accepted in the months of June and July.

# **Provider-Administered Medications Available Through the Specialty Pharmacy Network**

Provider-administered specialty pharmacy products are ordered by a doctor and administered in an office or outpatient setting. To get Prior Authorization for provider-administered specialty drugs (shown below), your network doctor must do one of the following:

- Call BlueCross BlueShield of Tennessee at 1-800-924-7141
- Log on to BlueAccess, the secure area of bcbst.com, select Service Center from the Main menu, followed by Authorization/Advance Determination Submission. If your doctor is not registered with BlueAccess or needs help using bcbst.com, he or she can call eBusiness Solutions at **1-800-924-7141** (option 4) or **423-535-5717** (option 2).

PA This drug requires prior authorization before dispensing/administration.

PA\* This product requires step therapy or prior authorization

## 2015 Prior Authorization List

To maximize your benefits, the drugs listed below need authorization from your benefit plan before they are dispensed by your pharmacy. Your network physician is responsible for obtaining prior authorization when prescribing a drug on this list. Ask your physician to make the call at the same time the medication is prescribed so there will be no delay when you go to the pharmacy.

The following list of drugs requires prior authorization:

Drug	Requirement
allergy (e.g. Grastek, Ragwitek)	PA required
anabolic steroids (e.g., Anadrol-50, Oxandrin)	PA required
androgens (e.g., Androderm, Androgel, Testim)	<b>PA</b> required for males 30 years and younger; <b>PA</b> required for all females
atypical antipsychotics (e.g., Abilify, Risperdal, Seroquel, Zyprexa)	PA required for patients 17 years and younger
modafinil	PA required
Nuvigil	PA required
retinoids (e.g., Avita, Retin-A, Tazorac)	PA required for patients 40 years and older
Specialty Pharmacy Products	Many of these drugs also require prior authorization. See Specialty Pharmacy Drug List.
Xyrem	PA required

The following drugs may not be covered by your plan. Check with customer service to determine coverage. If covered by the plan, these drugs also require prior authorization.

anti-obesity drugs (e.g., benzphetamine, diethylpropion, orlistat (Xenical), phendimetrazine, phentermine, Belviq, Qsymia) chemical dependency/detoxification (e.g., buprenorphine, buprenorphine/naloxone, Campral, disulfiram, Revia, Suboxone) erectile dysfunction drugs (e.g., Caverject, Cialis, Edex, Levitra, Muse, Staxyn, Viagra)

growth hormone (Norditropin)

# **2015 Step Therapy List**

A form of prior authorization that begins drug therapy for a medical condition with the most cost-effective and safest drug therapy. To have these medications covered under your prescription drug benefit, you may be required to first try an alternative or complete the prior authorization process. It progresses to alternate drugs only if necessary. Prescription drugs subject to step therapy guidelines are: (1) used only for patients with certain conditions; (2) Covered only for patients who failed to respond to or demonstrated an intolerance to alternate prescription drugs as supported by appropriate medical documentation; and (3) when used with selected prescription drugs to treat your condition.

The following list of drugs requires step therapy:

Drug	Requirement
Angiotensin II Receptor Blocker	trial and failure of generic ARB or Benicar/Benicar HCT
Edarbi/Edarbyclor	
Teveten/Teveten HCT	
Betaseron	trial and failure of Avonex, Copaxone, Extavia, or Rebif
Diabetic Test Strips (Freestyle/Accu-Chek)	trial and failure of preferred products made by Lifescan (OneTouch) or Bayer (Contour or Breeze2)
Glaucoma Agents	trial and failure of latanoprost or Lumigan or Travatan Z
Rescula	
Xalatan	
Zioptan	
Humulin	trial and failure of Novolin
Humalog / Apidra	trial and failure of Novolog
Nasal Steroids	trial and failure of budesonide, flunisolide, fluticasone, Dymista, or Veramyst
Beconase AQ	
Flonase	
Nasonex	
Omnaris	
Short-acting Beta Agonists	trial and failure of ProAir HFA and ProAir Respiclick
Proventil HFA	
Ventolin HFA	
Xopenex HFA	
Testim	trial and failure of Androderm <b>PA</b> or Androgel <b>PA</b>

# **2015 Quantity Limit List**

Quantity limits help promote appropriate use of selected drugs and enhance patient safety. If your prescription is written for more than the allowed quantity, it will be filled to the allowed quantity. Your doctor can request a greater quantity for medical necessity reasons.

The following list of drugs require quantity limits:

Drug	Limit
Anaphylaxis Agents (e.g., Auvi-Q, Epipen, Epipen Jr.)	2 kits/30 days
buprenorphine, oral:	Maximum of any combination of oral buprenorphine products of #90/30 days
Bunavail	
buprenorphine SL tablet (Subutex)	
buprenorphine hcl/naloxone hcl SL tablet (Suboxone)	
Suboxone SL film	
Zubsolv	
morphine sulfate er, caps (Avinza)	120 capsules/30 days (max 480mg/day)
Diabetic supplies	306 qty/30 days; 918 qty/90 days
Fentanyl oral products:	Maximum of any combination oral fentanyl products of 16 units/30 days OR single product limitations as follows:
Abstral	8 units/30 days
Actiq	6 lozenges/30 days
fentanyl lozenges	6 lozenges/30 days
Fentora	8 tablets/30 days
Onsolis	8 buccal films/30 days
Low molecular weight heparins (e.g., enoxaparin, fondaparinux, Arixtra, Fragmin, Lovenox)	42 day supply/365 days
Migraine drug, injections and nasal spray:	
Migranal	Up to 1 kit in a 30-day period
sumatriptan (Imitrex, Alsuma) Injection	Up to 8 syringes or vials/4 kits in a 30-day period
sumatriptan (Imitrex) nasal spray	Up to 12 devices in a 30-day period
Sumavel Dosepro	Up to 8 syringes or vials/4 kits in a 30-day period
Zomig nasal spray	Up to 2 cartons (40mg) in a 30-day period
Migraine drugs, tablets:	18 tablets in a 30-day period
almotriptan (Axert)	
Frova	
naratriptan (Amerge)	
Relpax	
rizatriptan (Maxalt/MLT)	
sumatriptan (Imitrex)	

# 2015 Quantity Limit List, Cont'd

Drug	Limit
zolmitriptan (Zomig/Zomig ZMT)	
Nucynta/Nucynta ER	180 tablets/30 days
Opana ER	120 tablets/30 days (max 160 mg/day)
OxyContin	120 tablets/30 days
Relenza	One treatment course per 180-day period
Specialty Pharmacy Products	Limited to one month's supply
Tamiflu	One treatment course per 180-day period
Tobi Podhaler	224 capsules/28 days
Tobi, tobramycin ampules	56 ampules/28 days
linezolid (Zyvox)	14 days of therapy, then <b>PA</b> required

Some plans do not cover the following medications. Check your benefit materials or call customer service to determine coverage before your doctor writes the prescription.

Erectile dysfunction:	
Caverject	8 injections/30 days
Cialis	8 tablets/30 days
Edex	8 injections/30 days
Levitra	8 tablets/30 days
MUSE	8 urethral suppositories/30 days
Staxyn	8 tablets/30 days
Stendra	8 tablets/30 days
Viagra	8 tablets/30 days
Ella	one tablet/Rx; 3 tablets/365 days

# **2015 Formulary Exclusion List**

Most plans do not reimburse for the following drugs. Refer to your EOC or member handbook for coverage details.

Excluded	Alternatives

## **2015 Preventive Drug List**

Medications on the Preventive Drug List help prevent and manage several health concerns.

Some of these conditions, if not prevented or managed, can lead to serious illnesses and complications. Following your doctor's treatment plan, including taking prescribed medications as directed, can help you live a healthier life today, and avoid serious illness and high health care costs in the future.

If your health plan includes the Preventive Drug List option, you just pay a copay for preventive care medications instead of having to meet your plan's deductible for certain prescription drugs. Prescription drugs on the Preventive Drug List will be covered as if you already met your deductible, so you are only responsible for paying the appropriate copay. This enhanced benefit to your health plan makes it easier for you to purchase the medications you and your family need to stay healthy today – and tomorrow.

Some plans may differ. Check your Evidence of Coverage (EOC) to see if this applies to your plan. This list contains some of the most commonly prescribed preventive care drugs and is not all-inclusive. This list does not guarantee coverage for preventive care drugs that are not listed. This list is subject to change throughout the year. Check bcbst.com for the current list. To ensure coverage, check your Schedule of Benefits or call Member Services at 1-800-565-9140.

# Affordable Care Act Requirements

The Affordable Care Act (ACA) requires certain categories of drugs and immunizations are included in preventive care services coverage based on recommendations from the U.S. Preventive Services Task Force (USPSTF). These recommendations are important in preventing diseases as well as providing additional women's services such as contraception. The following products may be available to you at out-of-pocket cost depending on your plan. Some plans may differ, so check your Evidence of Coverage (EOC) for details.

<b>Drug or Drug Category</b>	Description	Coverage Criteria	Reason
Aspirin	Generic OTC 81mg and 325mg	Males ages 45-79 years and Females ages 55 to 79 years	Prevent cardiovascular disease

Women's Contraceptives	Generic prescription oral contra- ceptives plus brand oral contra- ceptives that do not have a generic equivalent	Females only – See Contraceptive Drug List	Prevent pregnancy

## Prescription Contraceptive Drug List

According to the Women's Preventive Services provision of the Affordable Care Act, BlueCross BlueShield of Tennessee offers access to prescription contraceptive drugs in this drug list to eligible members at no cost when filled by in-network pharmacies. This provision is effective during your employer group's benefit enrollment period.

The drugs listed below are prescription generic oral and injectable contraceptives, vaginal ring and hormonal patch, and are covered at no cost to you. Other brand name prescription contraceptives and other drugs may be covered subject to cost share under the prescription drug rider, if applicable to your plan. For members with the Contraceptive Only rider, only the items on this list are covered. Some plans may differ. Check your Evidence of Coverage (EOC) to see if this applies to your plan.
