

Comprehensive Diabetes Care – Medical Attention for Nephropathy (CDC-Neph)

One prevention and screening measure for the Centers for Medicare & Medicaid Services (CMS) Star ratings system and the Healthcare Effectiveness Data and Information Set (HEDIS®) is Comprehensive Diabetic Care – Medical Attention for Nephropathy. It measures the percentage of members 18 to 75 years of age with diabetes (type 1 and type 2) who have received medical attention for nephropathy through a screening test. Below are the Current Procedural Terminology (CPT®), Current Procedural Technology Category II (CPT®II) and Logical Observation Identifiers Names and Codes (LOINC®) codes that indicate the nephropathy screening test has been performed.
