March 2008

A Better DentalBlue for You and Your Employees in 2008

Now that 2008 is well under way you can count on BlueCross BlueShield of Tennessee for your dental products. All fully-insured dental groups with 2008 effective dates will have implant coverage added. Implants are no longer an experimental service and can many times be more cost effective than a bridge. Anesthesia in conjunction with this service will also be covered. Other plan options are now available, please contact your broker or account manager for more information.
