And add the date

The Facts About Generic Drugs

Generic drugs are approved by the FDA (the Food and Drug Administration) as safe and effective choices you can make — and they save you money.

Generic drugs are safe, effective and affordable. They're made with the same active ingredients and produce the same effects in the body as their brand-name equivalents. By federal law, each generic drug is laboratory-tested to make sure that the same amount of drug will be absorbed into the bloodstream.

The difference? Just the name and price—and generics cost less. For more information, visit the BlueCross BlueShield of Tennessee Web site at www.bcbst.com.
