

The CoverTN prescription drug plan is designed to save you money. All of the drugs on the CoverTN Drug Formulary are generic except for some brand-name insulin and diabetic supplies. The formulary includes choices of many popular generics that have been approved by the U.S. Food and Drug Administration (FDA) as safe and effective. We advise you to share the CoverTN Drug Formulary with your doctor to help coordinate your medication needs. We suggest you take this drug list with you to all doctor appointments. You will pay a co-pay for the drugs and supplies listed in the Formulary, and will be required to pay 100 percent of the discounted price for the drugs and supplies that are not covered.
