

Chiropractic Procedure and Diagnosis Codes Eligible for Commercial Reimbursement

Benefits for chiropractic services may be considered if the chiropractic service is eligible under the member's health benefits plan and both the procedure **and** diagnosis code are included on the following list.

BlueCross BlueShield of Tennessee medical directors, with assistance from the Tennessee Chiropractic Association (TCA), developed the following list of procedure and diagnosis codes that will be considered for reimbursement when the chiropractic service is eligible under the commercial member's health benefits plan. Health care practitioners may confirm a commercial member's benefits by calling the Provider Service Line at 1-800-924-7141.

Note: Reimbursement will only be considered for dates of service when the code is active per coding guidelines.

This listing does not apply to BlueCare® or TennCareSelect

Procedure Codes
