

**Volunteer State Health Plan (VSHP) manages TennCare*Select* Supplemental Security Income (SSI) and Department of Children’s Services (DCS) population**

The TennCare*Select* Network was created on behalf of the State to provide services to populations who are more difficult to serve because of their health care needs, their mobility, and/or their geographic location and to serve as a “back up” in any area of the state where TennCare members cannot be adequately served by another TennCare manage care organization (MCO).

TennCare*Select* members in Middle Tennessee were recently transitioned to new MCOs. However, SSI and DCS children assigned to TennCare*Select* in Middle Tennessee were not affected and their care management continues to be managed by VSHP.

If you need additional information, call Best Practice Network provider service at 1-800-451-9147.
