Although pregnancy is an exciting time for expectant mothers, babies are born every day with complications that could have been avoided through proper nutrition counseling and early prenatal care. We need your help to encourage pregnant women to seek prenatal care and remind them to complete their postpartum visit.

**What is the quality measure?**

This quality measure focuses on your pregnant patients for whom you will provide prenatal and postpartum care. It is important that you:

- Schedule their first prenatal care visit within their first trimester.
- Schedule their postpartum visit between 21 to 56 days after delivery.

**What can you do to improve this quality measure?**

You play an essential role in developing and ensuring member trust by offering high-quality care. You can help us maintain a high level of quality care by:

1. Encouraging pregnant patients to schedule their first prenatal visit within the first trimester or as soon as they suspect they are pregnant.
2. Helping pregnant patients schedule regular prenatal care visits and sending appointment reminders to avoid missed appointments.
3. Reminding pregnant patients to complete their postpartum visit and scheduling it 21 to 56 days after delivery.
4. Counseling pregnant patients about proper nutrition and pregnancy wellness tips.
5. Ensure documentation of all prenatal and postpartum visits.

**CODING TIPS:**

Submit claims and encounter data quickly and accurately (please see the sample codes below)

You receive the highest scores when visits are correctly documented on a claim.

**SAMPLE DIAGNOSES:**

Pregnancy, High-Risk Pregnancy, Young Primigravida, Elderly Primigravida, Elderly Multigravida
