

**ASC X12N 270/271 (004010X092A1)**

**Health Care Eligibility Benefit Inquiry and Response  
Companion Guide**

**For Blue CORE System**

BlueCross BlueShield of Tennessee CAQH/CORE certified eligibility and benefit inquiry system. Blue CORE currently supports phase 1 operating rules defined by CAQH/CORE.

## **Disclosure Statement**

The information in this document is subject to change. Changes will be communicated via the BlueCross BlueShield of Tennessee Web site,

<http://www.bcbst.com/providers/ecom/technical-information> or  
<https://bluecore.bcbst.com>

The 271 response returned by BlueCross BlueShield of Tennessee should not be interpreted as a guarantee of payment. Payment of benefits remains subject to all health benefit plan terms, limits, conditions, exclusions and the member's eligibility at the time services are rendered.

## Preface

The Health Insurance Portability and Accountability Act (HIPAA) requires health insurance payers in the United States to comply with the EDI standards for health care as defined in the ASC X12N Implementation Guides.

The following information is intended to serve as a companion document to the HIPAA ASC X12N 270/271 (004010X092A1) Implementation Guide for Eligibility Benefits Inquiry. The use of this document is solely for the purpose of clarification on usage of the Blue CORE solution.

The information describes specific requirements for submitting eligibility and benefit inquiry requests for BlueCross BlueShield of Tennessee commercial, BlueCare and TennCare*Select* members through Blue CORE. Blue CORE is BlueCross BlueShield of Tennessee's "CORE Certified" solution to real-time eligibility and benefits information. Blue CORE cannot process inquiries for BlueCard, Federal Employee Program (FEP) or Medicare members. The addition of eligibility availability through the Blue CORE solution for Federal Employee Program (FEP) and BlueCard subscribers will be August 2007.

This companion document supplements, but does not exceed any requirements in the ASC X12N 270/271 (004010X092A1) Implementation Guide.

# INTRODUCTION

This application for real-time and batch 270/271's follows the CAQH/CORE phase I guidelines.

## Scope

Providers, billing services and clearinghouses are advised to use the ASC X12N 270/271 (004010X092A1) Implementation Guide as a basis for their submission of Eligibility and Benefit inquiries. This companion document should be used to clarify the CORE Business rules for 270/271 data content requirements, batch and real-time acknowledgment, connectivity, response time, and, system availability, specifically for submissions through the Blue CORE system. These rules differ from the Companion Guide for submissions via the BlueCross BlueShield of Tennessee's ECGateway connection. This document is intended for use with CAQH CORE compliant systems. For additional information on building a CORE compliant system go to [www.caqh.org](http://www.caqh.org).

## Overview

The purpose of this document is to introduce and provide information about BlueCross BlueShield of Tennessee's CAQH/CORE certified solution for submitting real-time 270/271 transactions.

### **What is CAQH?**

CAQH stands for The Council for Affordable and Quality Healthcare. It is a not-for-profit alliance of health plans, provider networks, and associations with a goal to provide a variety of solutions to simplify health care administration.

### **What is CORE?**

The Committee on Operating Rules for Information Exchange (CORE) is a multi-stakeholder initiative created, organized and facilitated by CAQH. CORE's Phase I goal is to create, disseminate, and maintain operating rules that enable health care providers to quickly and securely obtain reliable health care eligibility and benefits information. CORE operating rules will decrease the amount of time and resources providers spend verifying patient eligibility, benefits and other administrative information at the point of care. CORE operating rules, envisioned to be introduced in multiple phases, have support from health plans, medical professional societies, providers, vendors, associations, regional entities, standard setting organizations, government agencies and other health care constituencies.

### **What is CAQH/CORE certification?**

Any entity that creates, transmits, or uses eligibility data is eligible to become CORE-certified. CORE-certification indicates an entity has signed the CORE Pledge and successfully completed certification testing, both of which are designed to demonstrate an entity's compliance with all the CORE Phase I rules. Any entity that agrees to follow the CORE operating rules will be expected to exchange eligibility and benefits information per the requirements of the CORE Phase I rules and policies, with all its trading partners. Given the requirements of the CORE Phase I rules, use of these rules by the industry will

enhance the usability and content of the eligibility transaction as well as decrease administrative costs and resources. See <http://www.cagh.org/>

## References

The following documents are suggested when preparing to send a 270 inquiry or receive a 271 response:

- BlueAccess registration instructions: [www.bcbst.com/blueaccess/](http://www.bcbst.com/blueaccess/).
- HIPAA (004010X092A1) Implementation Guide for Eligibility Benefits Inquiry <http://www.wpc-edi.com/hipaa>

## Additional Information

- Submitters must have Internet (HTTPS) connection capability to submit a CORE 270 request and receive 271 responses.
- Submitters must possess a valid BlueAccess user ID and password in order to submit inquiries through the Blue CORE option.
- The submitter must be associated with at least one provider in the BlueCross BlueShield of Tennessee provider database.
- Both real-time and batch 270 inquiries are supported.
- This system supports inquiries for BlueCross BlueShield of Tennessee commercial, BlueCare and TennCare*Select* members only. (FEP and BlueCard inquiries coming in August 2007).

# GETTING STARTED

## Working with BlueCross BlueShield of Tennessee

Providers, billing services and clearinghouses interested in submitting 270 inquiries and receiving 271 responses via BlueCross BlueShield of Tennessee's CORE Certified Solution should contact BlueCross BlueShield of Tennessee at (423) 535-5717, Monday through Friday, 8 a.m. to 6:30 p.m. (ET).

## Trading Partner Registration

Trading Partner Registration is not required in order to submit Blue CORE 270 requests.

## Certification and Testing Overview

BlueCross BlueShield of Tennessee recommends submitting at least one test file to ensure connectivity and data transfer is successful. The testing links are below:

Real Time <https://beta-bluecore.bcbst.com/bluecore/bluecoreservlet>

(single inquiry containing 1 ISA-IEA, 1 GS-GE and a single ST-SE segment)

Batch <https://beta-bluecorebatch.bcbst.com/bluecore/bluecoreservlet>

(batch transmission containing 1 ISA-IEA, 1 GS-GE and multiple ST-SE segments)

## TESTING WITH THE PAYER

Listed below are steps to follow when testing:

- Register for BlueAccess user ID and password (only if user doesn't already have a valid BlueAccess user ID)
- Create test transaction based on Companion Guide/Implementation Guide specifications
- Submit via the appropriate testing link, either Real-Time or Batch
- Retrieve appropriate response (TA1, 997, 271)
- Review response to determine production readiness

## CONNECTIVITY/COMMUNICATIONS

### Blue CORE System Availability

Monday-Sunday 3 a.m.-2 a.m. (following day)

(system maintenance from 2:01a.m.-2:59a.m)

Thursday (system maintenance 7p.m–10 p.m)

Please refer to the Blue CORE Splash page <https://bluecore.bcbst.com/> for the most up-to-date information on system availability. All scheduled downtimes will be posted and emergency downtimes will be reflected

### Process Flows

#### Real-Time Submission

1. The user application submits an HTTPS request to:  
<https://bluecore.bcbst.com/bluecore/bluecoreservlet>

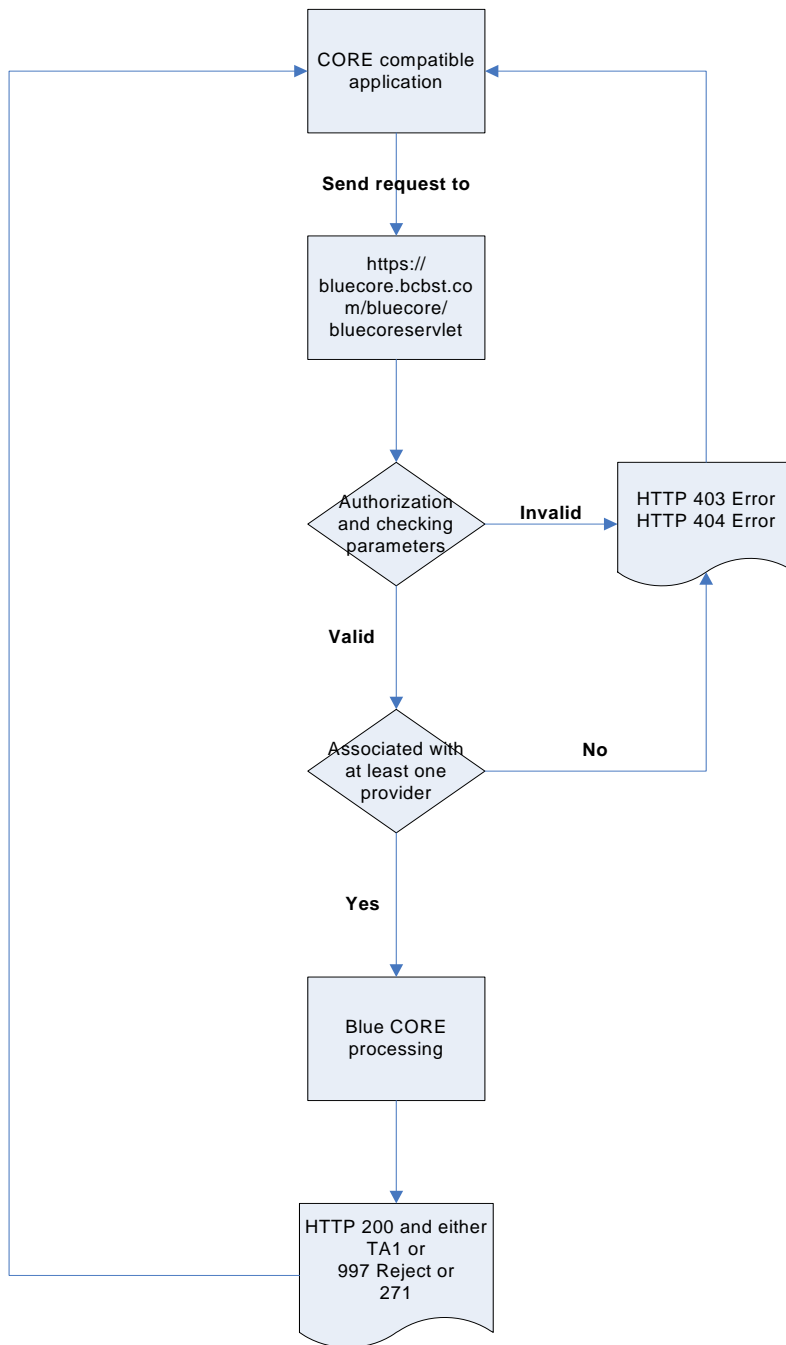

See Appendix 1 for example of Real Time HTTPS request form.

The required HTTPS header parameters are as follows:

- a. username
  - b. password
  - c. original task id (the original task id must follow this format:  
YYDDDDHHMMSSSS)  
(the 270 transaction is included as part of the overall file)
2. The Blue CORE system authenticates the user and ensures the user has been associate with at least one provider number in the BlueCross BlueShield of Tennessee provider database. If the user is not authorized, or is authorized but not associated with at least one BlueCross BlueShield of Tennessee provider, an HTTP 403 Forbidden response is returned.
  3. If the user is successfully authorized, an HTTP 200 OK status response will be returned to the user within 20 seconds and the following files will be issued:
    - TA1 (if problem with the ISA/IEA segments exist)
    - 997 Reject (if problem occurs within the subsequent loops and segments)
    - 271

The diagram below shows the process flow for **Real-Time** submission.

## Batch Submission

1. The user application submits an HTTPS request to:  
<https://bluecorebatch.bcbst.com/bluecore/bluecoreservlet>

See Appendix 1 for example of Batch HTTPS request form

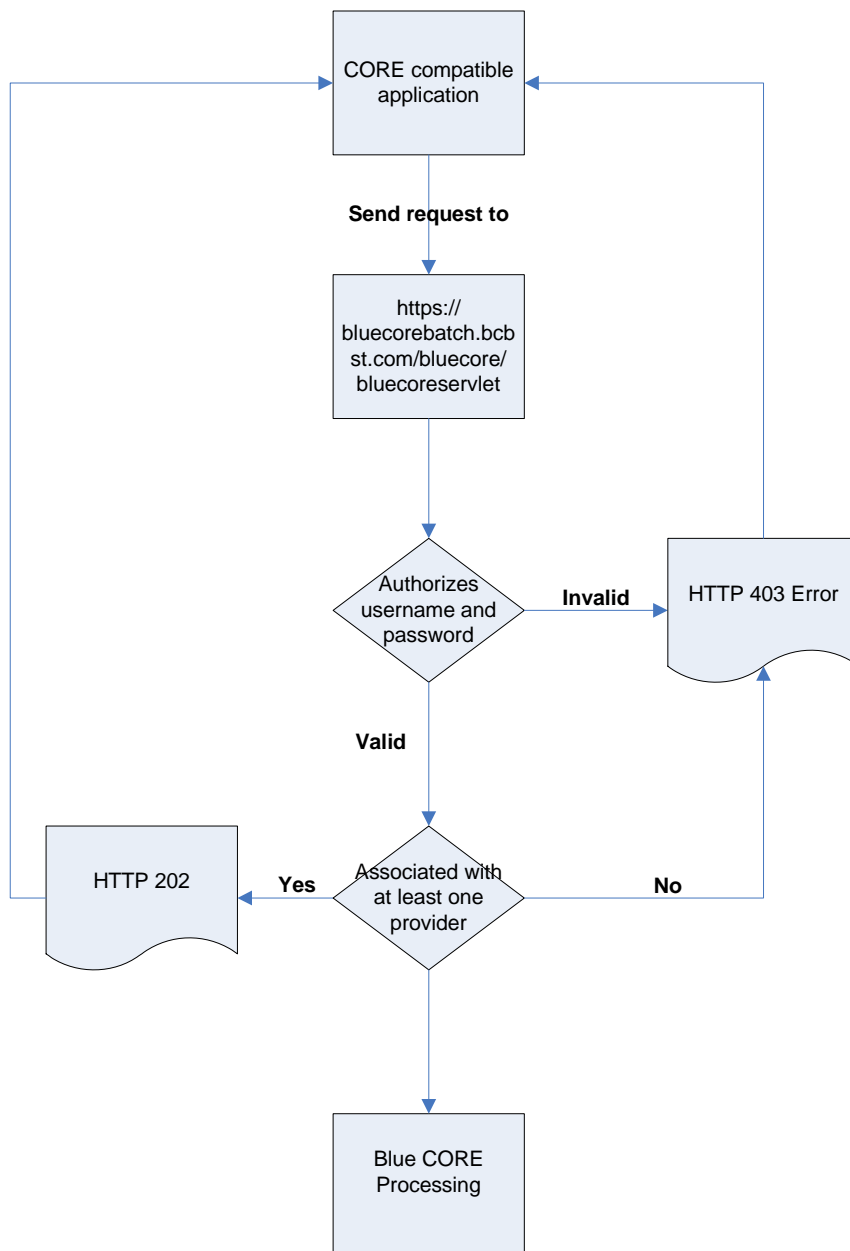

The required HTTPS header parameters are as follows:

- a. username
- b. password
- c. original task id (the original. task id must follow this format:  
YYDDHHMMSSS)  
(the 270 transaction is included as part of the over-all file.)

The Blue CORE system authenticates the user and ensures the user has been associated with at least one provider in the BlueCross BlueShield of Tennessee provider database. If the user is not authorized, or is authorized but not associated with at least one BlueCross BlueShield of Tennessee provider number, then an HTTP 403 Forbidden response is returned.

2. If the user is successfully authorized, an HTTP 202 OK status is returned to the user indicating BlueCross BlueShield of Tennessee has accepted the batch transaction for processing.
3. A response to the batch submission will be available by 7 a.m. the following day. Batch requests submitted after 9 p.m. (ET) will be available by 7 a.m. two days following submission.

The diagram below shows the process flow for **Batch** submission.

## Batch Pick-Up Process

The user submits an HTTPS pick-up request to:

<https://bluecorebatch.bcbst.com/bluecore/bluecoreservlet>

See Appendix 1 for example of Batch Pick Up HTTPS request form

The same original task ID used in the batch submission request must be included in the batch pick-up request.

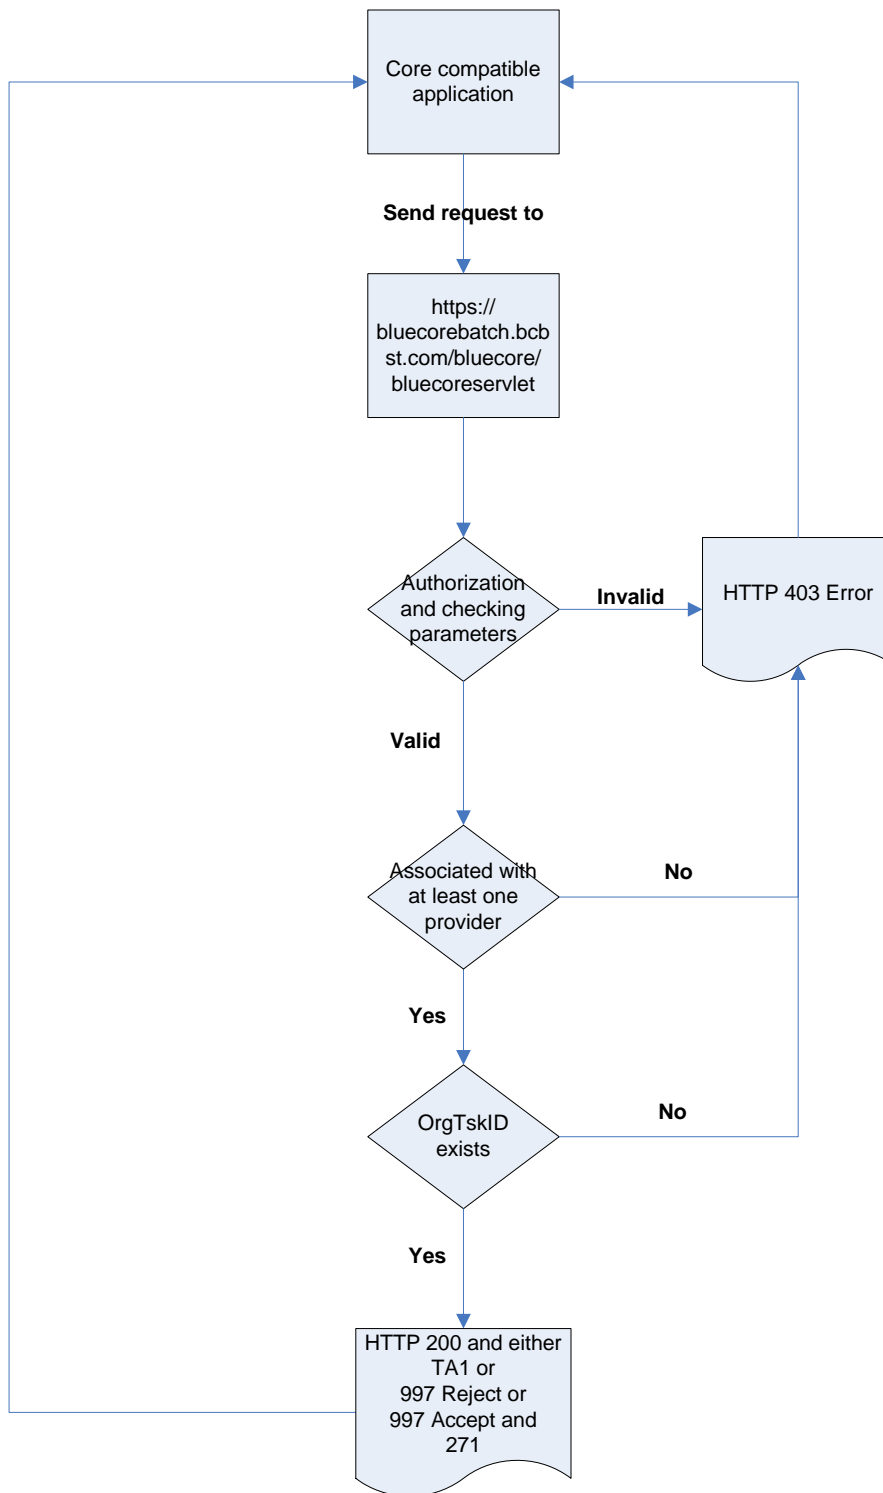

1. The required HTTPS header parameters are as follows:
  - a. username
  - b. password
  - c. original task id (the original task id included in the batch submission request)
2. The Blue CORE system authenticates the user and ensures the user has been associated with at least one provider in the BlueCross BlueShield of Tennessee provider database. If the user is not authorized, or is authorized but not associated with at least one BlueCross BlueShield of Tennessee provider number, then an HTTP 403 Forbidden response is returned.
3. If the user is successfully authorized, one of the following will be generated back to the user:
  - TA1 available within one hour, if there is a problem with the ISA or IEA segments
  - 997 Reject available within one hour, if there is a problem with the segments occurring between the ISA and IEA.
  - 997 Acceptance response will be available within one hour. The 271 transaction(s) will be available the following day (no later than 7:00a.m.) appended to the original 997 acceptance response.

*\*\*There should be NO file attached to the batch pickup request form.*

*\*\*The 271 batch response file may contain a single or multiple 271 transactions. In Blue CORE batch transmissions, each 270 must be enveloped in its own ST-SE segment. There will be a 271 response for every occurrence of ST-SE segments in the file.*

*\*\*All 997s and 271s will be available for retrieval for at least 30 days.*

The diagram below shows the process flow for **Batch Pick Up**.

## Transmission Administrative Procedures

Real-time 270 requests are limited to one inquiry, per patient per transaction. A response (TA1, 997 reject or 271) to the inquiry will be provided within 20 seconds. See Appendix 1 for examples of Response Files.

Batch 270 requests are not limited to the number of inquiries per transaction. However, each batch inquiry **must** be in its own ST/SE. A response to the batch inquiry will be provided by 7 a.m.(ET) the following day. Batch requests submitted after 9 p.m. (ET) will be available by 7 a.m. (ET) two days following submission.

## Re-Transmission Procedure

If the HTTP post reply message is not received within the 60-second response period, the user's CORE compliant system should send a duplicate transaction no sooner than 90 seconds after the original attempt was sent.

If no response is received after the second attempt, the user's CORE compliant system should submit no more than five duplicate transactions within the next 15 minutes. If the additional attempts result in the same timeout termination, the user's CORE compliant system should notify the user to contact the health plan or information source directly to determine if system availability problems exist or if there are known Internet traffic constraints causing the delay.

## Communication Protocol Specifications

### Web Addresses

#### Testing

Real Time Submission: <https://beta-bluecore.bcbst.com/bluecore/bluecoreservlet>

(single inquiry, containing 1 ISA-IEA, 1 GS-GE and 1 ST-SE)

Batch Submission: <https://beta-bluecorebatch.bcbst.com/bluecore/bluecoreservlet>

(multiple inquiries, containing 1 ISA-IEA, 1 GS-GE and multiple ST-SE segments)

#### Production/Live

Real Time Submission: <https://bluecore.bcbst.com/bluecore/bluecoreservlet>

(single inquiry, containing 1 ISA-IEA, 1 GS-GE and 1 ST-SE)

Batch Submission: <https://bluecorebatch.bcbst.com/bluecore/bluecoreservlet>

(multiple inquiries, containing 1 ISA-IEA, 1 GS-GE and multiple ST-SE segments )

## HTTP Error Messages

Below is a list of all the HTTP codes that could be returned back to a sender by the Blue CORE system:

- HTTP 200 – Accept for Real-Time Submission or Batch Pick Up
- HTTP 202 -- Accept for Batch Submission
- HTTP 403 -- Forbidden for incorrect username or password
- HTTP 404 – If file is not attached or original task ID does not match a request on file
- HTTP 500 – Internal Server error

## Security and Authentication Requirements

Certain business data elements, authorization information, original user task id, and date and time stamps, must be included in the HTTP message body outside of the X12 data. By using the HTTP/S protocol, all information exchanged between the sender and receiver is encrypted by a session-level private key negotiated at connection time. This approach makes it very difficult for an intruder to decode the encrypted data and this allows message receivers to authenticate that the message is from a trusted source before passing it to their X12 parsing engine. See Appendices 1 for an example of HTTPS data stream.

## Passwords

A unique user ID and password must be included in the HTTP message body outside of the X12 data when submitting a 270 inquiry. Submitters obtain a user ID and password through registration on BlueAccess, the secure area of BlueCross BlueShield of Tennessee's Web site at <http://www.bcbst.com/blueaccess/>. Submitters must also associate the BlueAccess user ID and password with at least one provider number in the BlueCross BlueShield of Tennessee provider database. Registration instructions are shown below.

*Note:* Submitters who already hold a valid BlueAccess user ID and password, and have associated the user ID and password with at least one provider number in the BlueCross BlueShield of Tennessee provider database, are ready to authenticate via the Blue CORE system. These users do not need to register for an additional BlueAccess user ID and password.

## User ID and Password Formats

The ID's and passwords are **case sensitive**.

- User ID: Must be 3-15 characters long and may only contain letters, numbers, and the underscore ( \_ ) character.
- Passwords: Must be at least six characters long, contain only letters and numbers, and must contain at least one letter and one number.

- Token question: Users will be asked to select a Token question and to provide a Token response. This is a personal question, such as what is your city of birth, that can be used to confirm the user's identity.

#### Registration Instructions:

- Log on to <http://www.bcbst.com/blueaccess/>.
- Select the appropriate option: Member, Enrolling member, Employer, Broker or Provider.
- Complete the registration form and click "Submit".  
The user ID, password and answer to token question are **case sensitive**. Please make note of the user ID and password. When submitting this user ID and password in the HTTP message body of the 270 request, an exact match is required for successful authentication.
- Log back on to [www.bcbst.com/](http://www.bcbst.com/).
- On the BlueAccess section, type in your user ID and password.
- Scroll to the bottom of the page and click on the link for "Request Shared Secret."
- Submit the number of BlueCross BlueShield of Tennessee providers for which you are requesting a shared secret.
- Enter at least one of your provider's seven-digit BlueCross BlueShield of Tennessee provider numbers
- A shared secret will be mailed to you within five business days for each provider number you entered.
- After you receive the shared secret log back on to <http://www.bcbst.com/>.
- Key in your user ID and password on the BlueAccess portion of the home page.
- Scroll to the bottom of the page and click on the link for "Update Permissions."
- Click on the "Add Providers" button.
- Key in each provider number, federal tax id and shared secret.
- Click on "Submit" and the providers will be added.

## CONTACT INFORMATION

<b>For Questions About:</b>	<b>Contact:</b>	<b>Telephone Number Fax Number e-Mail Address Hours of Operation</b>

<u>Provider Service</u> - Voice-activated line for claims payment, eligibility and benefits information	Customer Service	1-800-924-7141 (voice response line, speak when prompted)  Monday-Friday, 8 a.m.- 5:15 p.m. (ET)

Technical Support and Provider Service representatives are not available on scheduled company holidays.

For a list of company holidays, system maintenance schedules, emergency down-time notices and the Blue CORE Companion Guide ,visit: <https://bluecore.bcbst.com/> .

## CONTROL SEGMENTS/ENVELOPES

### ISA-IEA (Incoming 270 Inquiry)

The ISA segment terminator, which immediately follows the component element separator, must consist of only one character code. This same character code must be used as the segment terminator for each segment in the ISA-IEA segment set.

Files **must** contain a single ISA-IEA per batch transaction.

ISA01 – Authorization Information Qualifier – ‘00’  
ISA02 – Authorization Information – always spaces  
ISA03 – Security Information Qualifier – ‘00’  
ISA04 – Security Information – always spaces  
ISA05 – Interchange ID Qualifier (*Sender*) – ‘ZZ’  
ISA06 – Interchange Sender ID – “Tax ID”  
ISA07 – Interchange ID Qualifier (*Receiver*) – ‘ZZ’  
ISA08 – Interchange Receiver ID – ‘00390’  
ISA09 – Interchange Date – YYMMDD – provided by your software  
ISA10 – Interchange Time – HHMM – provided by your software  
ISA11 – Interchange Control Standards Identifier – ‘U’  
ISA12 – Interchange Control Version Number – ‘00401’  
ISA13 – Interchange Control Number – assigned by your software (usually sequential integer)  
ISA14 – Acknowledgement Requested – ‘1’  
ISA15 – Usage Indicator – ‘P’ should always be  
ISA16 – Component Element Separator (delimits components within a data element) – provided by your software

IEA01 – Number of Included Functional Groups  
IEA01 – Interchange Control Number – must match the Interchange Control Number in ISA13

### GS-GE (for the Incoming 270 Inquiry)

Files **must** contain a single GS-GE per batch or real time transaction.

GS01 – Functional Identifier Code – ‘HS’ (for 270 transactions)  
GS02 – Application Sender’s Code – (Tax ID)  
GS03 – Application Receiver’s Code – ‘00390’  
GS04 – Date – CCYYMMDD – provided by your software  
GS05 – Time – HHMM – provided by your software  
GS06 – Group Control Number – assigned by your software (usually sequential integer)  
GS07 – Responsible Agency Code – ‘X’  
GS08 – Version/Release/Industry Identifier Code – ‘004010X092A1’

GE01 – Number of Transaction Sets Included  
GE02 – Group Control Number – must match Group Control Number in GS06

---

## **ST-SE**

Each 270 request within a Batch transaction **must** be wrapped in its own ST-SE segment. Real-Time inquiries must contain only one ST-SE segment.

### **ISA-IEA (Outgoing 271 Response)**

The ISA segment terminator, which immediately follows the component element separator, must consist of only one character code. This same character code must be used as the segment terminator for each segment in the ISA-IEA segment set.

- ISA01 – Authorization Information Qualifier – always '00'
  - ISA02 – Authorization Information – always spaces
  - ISA03 – Security Information Qualifier – always '00'
  - ISA04 – Security Information – always spaces
  - ISA05 – Interchange ID Qualifier (*Sender*) – 'ZZ'
  - ISA06 – Interchange Sender ID – '00390'
  - ISA07 – Interchange ID Qualifier (*Receiver*)
  - ISA08 – Interchange Receiver ID – (Tax ID)
  - ISA09 – Interchange Date – YYMMDD – date processed
  - ISA10 – Interchange Time – HHMM – time processed
  - ISA11 – Interchange Control Standards Identifier – 'U'
  - ISA12 – Interchange Control Version Number – '00401'
  - ISA13 – Interchange Control Number – Assigned by original sender's software
  - ISA14 – Acknowledgement Requested – '0' on 997 acknowledgements
  - ISA15 – Usage Indicator 'P'-should always be used
  - ISA16 – Component Element Separator – provided by your software
- 
- IEA01 – Number of Included Functional Groups
  - IEA01 – Interchange Control Number – must match the Interchange Control Number in ISA13

### **GS-GE (Outgoing 271 Response)**

- GS01 – Functional Identifier Code – 'HB' (for 271 transactions)
  - GS02 – Application Sender's Code – '00390' (*Sender*)
  - GS03 – Application Receiver's Code – (usually Tax ID)
  - GS04 – Date – CCYYMMDD – date processed
  - GS05 – Time – HHMM time processed
  - GS06 – Group Control Number – assigned number (usually sequential integer)
  - GS07 – Responsible Agency Code – 'X'
  - GS08 – Version/Release/Industry Identifier Code – '004010X092A1'
- 
- GE01 – Number of Transaction Sets Included
  - GE02 – Group Control Number – matches Group Control Number in GS06

## PAYER-SPECIFIC BUSINESS RULES AND LIMITATIONS

Blue CORE supports the following 270 Service Types and will respond on the 271 with the noted service types. Requested service types other than the ones listed below will result in a default list of responses in the 271. The default service type is 30. Please review service type 30 below for clarification.

## ACKNOWLEDGEMENTS

**Real-Time** – One of the following will be provided in response to a 270 inquiry.

- TA1 Interchange Acknowledgement if the ISA-IEA envelope cannot be processed.
- 997 Functional Acknowledgement if the 270 transaction contains HIPAA compliancy errors within the ST-SE segments.
- 271 Response Transaction indicating the requested member's coverage or benefits.

**Batch** - One of the following responses will be provided in response to a 270 inquiry.

- TA1 Interchange Acknowledgement, available within one hour, if the ISA-IEA envelope cannot be processed.
- 997 Functional Acknowledgment (Reject), will be available within one hour, if the 270 transaction contains HIPAA compliancy errors within the ST-SE segments.
- 997 Acceptance response will be available within one hour. The 271 transaction(s) will be available the following day (no later than 7:00a.m.) appended to the original 997 acceptance response.

**\*\*The 271 batch response file may contain a single or multiple 271 transactions. In Blue CORE batch transmissions each 270 must be enveloped in its own ST-SE segment. There will be a 271 response for every occurrence of ST-SE segments in the file.**

Listed below are examples of responses to a CORE 270 request:

## TRADING PARTNER AGREEMENTS

A Trading Partner Agreement is not required for Blue CORE transactions.

## TRANSACTION SPECIFIC INFORMATION

Listed below are specific requirements that BlueCross BlueShield of Tennessee requires over and above the standard information in the, ASC X12N 270/271 (004010X092A1) Health Care Eligibility Benefit Inquiry and Response, Implementation Guide.

**We strongly recommend the use of upper-case alpha-characters. This will ensure data lookup compatibility.**

The following data elements are required:

### Loop 2100A

- NM101 should be 'PR'
- NM102 should be '2'
- NM108 should be 'PI'
- NM109 should be '00390'

Include at least one TRN segment in either the subscriber or dependent loop (2000C, 2000D respectively).

Include one or more EQ segments in either the subscriber or dependent loop (2110C, 2110D respectively). If more than one EQ segment is given, Blue CORE will respond with a default service type of 30.

Any Service Type Code submitted in the EQ01 segment, that is not included in the Service Type list on pages 21-23, will be converted to a '30' type for processing.

If the patient is the subscriber, the following data elements are required:

### Loop 2100C

- Insured/Subscriber Last Name (NM103)
- Insured/Subscriber First Name (NM104)
- Insured/Subscriber Member ID (NM109, with NM108 = 'MI')
- Insured/Subscriber Date of Birth (DMG02)
- Insured/Subscriber Gender (DMG03)

If the patient is NOT the subscriber, the following data elements are required:

Loop 2100C

- Subscriber's Member ID (NM109, with NM108 = 'MI')

Loop 2100D

- Dependent Last Name (NM103)
- Dependent First Name (NM104)
- Dependent Date of Birth (DMG02)
- Dependent Gender (DMG03)

**The more information provided in your request, the more accurate the response will be.**

Delimiters

BlueCross BlueShield of Tennessee will utilize the delimiters defined in the submitter's 270 inquiry when returning a 271 response.

Disclaimer

UNLESS OTHERWISE REQUIRED BY STATE LAW, THIS NOTICE IS SHOULD NOT BE INTERPRETED AS A GUARANTEE OF PAYMENT. PAYMENT OF BENEFITS IS SUBJECT TO ALL HEALTH BENEFIT PLAN TERMS, LIMITS, CONDITIONS, EXCLUSIONS AND THE MEMBER'S ELIGIBILITY AT THE TIME SERVICES ARE RENDERED.

- 1      Transmission Examples**
- 2      Frequently Asked Questions**

## Appendices 1. Transmission Examples

### What is HTTPS?

The secure hypertext transfer protocol (HTTPS) is a communications protocol designed to transfer encrypted information between computers over the World Wide Web. HTTPS is <http> using a Secure Socket Layer (SSL). A secure socket layer is an encryption protocol invoked on a Web server that uses HTTPS.

Most implementations of the HTTPS protocol involve online purchasing or the exchange of private information. Accessing a secure server often requires some sort of registration, login, or purchase.

The successful use of the HTTPS protocol requires a secure server to handle the request.

Below is an example of a Real Time HTTPS request form:

```
<html>
<head>
<title>Submitter Real Time Validation Test Harness</title>
<meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1">
</head>
<body>
<form action="https://bluecore.bcbst.com/bluecore/bluecoreservlet" method="post"
enctype="multipart/form-data" name="myForm" target="_self">
<input type="hidden" name="Username" value="Username"><br>
<input type="hidden" name="Password" value="Password"><br>
<table>
<tr><td>OrgTaskID</td><td><input name="OrgTaskID" type="text"
value="072071045232"></td></tr>
<tr><td>File</td><td><input name="attchm" type="file"></td></tr>
<tr><td>&nbsp;</td><td><input name="Submit" type="submit"
value="Submit"></td></tr>
</table></form>
</body>
</html>
```

Below is an example of a Batch submission HTTPS request form:

```
<FORM METHOD="post" ACTION="http:// bluecorebatch.bcbst.com/bluecore/bluecoreservlet "
ENCTYPE="multipart/form-data">
<table>
  <tr><td>Username</td><td width="176"><input type="text" name="Username" value="
Username"></td></tr>
  <tr><td>Password</td><td width="176"><input type="password" name="Password" value="
Password"></td></tr>
  <tr><td>OrgTaskID</td><td width="176"><input name="OrgTaskID" type="text"
value="072071045232" ></td></tr>
  <tr><td>File</td><td width="176"><input name="attchm" type="file" ></td></tr>
  <tr><td>&nbsp;</td><td width="176"><input name="Submit" type="submit"
value="Submit"><INPUT TYPE="RESET"></td></tr>
</table>
</FORM>
```

Below is an example of a Batch Pickup HTTPS request form:

```
<FORM METHOD="POST" ACTION="http:// bluecorebatch.bcbst.com/bluecore/bluecoreservlet"
ENCTYPE="text/html">
<table>
  <tr><td><P><B>Username</B></P></td><td width="403"><input type="text" name="Username"
value=" Username"></td></tr>
  <tr><td><P><B>Password</B></P></td><td width="403"><input type="password"
name="Password" value=" Password"></td></tr>
  <tr><td><P><B>OrgTaskID</B></P></td><td width="403"><input name="OrgTaskID" type="text"
value="072071045232"></td></tr>
  <tr><td></td><td width="403"></td></tr>
  <tr><td height="37"><INPUT name="Submit" TYPE="submit"
value="Submit">
</td></tr>
<tr><td height="2"></td><td height="2"></td></tr>
</table>
</FORM>
```

## Appendices 2. FAQ's

- Is there a charge for a provider to submit 270 requests and receive 271 responses back through the Blue CORE Web site?

*This is a free service offered by BlueCross BlueShield of Tennessee to providers, clearinghouses and billing services and there are no fees associated with the use of this service.*

- Once a request is submitted when will a response be received back from BlueCross BlueShield of Tennessee?

*A single real-time request will receive a response back within 20 seconds. A Batch request (multiple requests sent within one file) will receive a response back by 7 a.m. the next day.*

- Who do I call for support if a problem arises? What are the hours?

Contact: *e-Business Services at (423)-535-5717 or [ecomm\\_techsupport@bcbst.com](mailto:ecomm_techsupport@bcbst.com).*

*Monday through Friday from 8 a.m to 6:30 p.m.(ET).*
